

H. R. LABOUNTY SAFETY AWARD PROGRAM NOMINATION FORM

ERGO-AP

Agency: Sweetwater Authority

Employee Nominated:

Name: Howard Rasmussen

Job Classification: Plant Maintenance Technician Leadworker

Reason for Nomination: For proper operation of the DAF Saturators correct pressure must be present in the saturator. The Operators and Maintenance staff would need to relief pressure from the tank by means of opening up the relief valve. This entailed bringing a large A frame or large extension ladder to the saturator in question. Howard fabricated a light weight aluminum extension handle and attached it to the valve. Thus eliminating the need for the ladders and possibility of back injury or a possible slip trying to maneuvering the ladders in close quarters.

Nominated by: Sweetwater Authority
