

H. R. LABOUNTY SAFETY AWARD PROGRAM

NOMINATION FORM

ERGO-AP
ERGO-PP

Agency: Madera Irrigation District

Employee Nominated:

Name: Rosendo Baldovinos

Job Classification: Engineering Technician I

Reason for Nomination:

Rosendo has been an active member of Madera Irrigation District's safety committee team for over a year and is always thinking of ways to improve safety. One of his duties of an Engineering Technician I is groundwater monitoring, which involves monthly well measurements in hundreds of locations. Measurements are done with a well sounder, running a cable down a well sounding tube anywhere from a 100' to 400', reeling the line up and down all day long. In the past you would set the sounder down on the ground and stoop forward on your knees over and over really straining your lower back and legs.

Simple but effective solution was to fabricate a stand bring the work level to your waist eliminating the bad posture. By improving the ergonomics of the work environment potential back strains has been reduced and work efficiency has improved.
