

NOMINATION FORM

JPIA WORKERS' COMPENSATION SAFETY AWARD PROGRAM

AGENCY: San Dieguito Water District

Employee Nominated:

Name: Mark Piskor

Job Classification: Utility and Maintenance Technician III

Reason for Nomination: I am nominating Mark for his workmanship in creating a safe and effective way to carry signs in a dump truck. Mark's method avoids damage the paint and reflecting material on the sign by not throwing them in the truck. Mark came up with the idea on his own and made the rack in the truck to hold the signs. The signs mount to the barricade by slipping a aluminium channel inside a larger aluminium channel. By using this method the whole sign is visable and meets or exceeds the ground clearance regulation minumum of 12". This method allows a 17" clearance, where previously they would stick the sign behind the wood on the bottom of the barricade. This is the same channel attached to the bed of the dump truck to hold the sign. the holder in the dump is easily removed for loading and unloading of debris. Mark is very handy when it comes to making the job easier and trying to save time and money. His enjinuity and thoughtfulness is appreciated.

Nominated by: Joe Aurora, Assistant Superintendent
